

We are committed to making the best use of taxpayer resources for our road network.

# We Preserve Our Roads.

Our community implements pavement preservation by utilizing well-timed surface treatments.

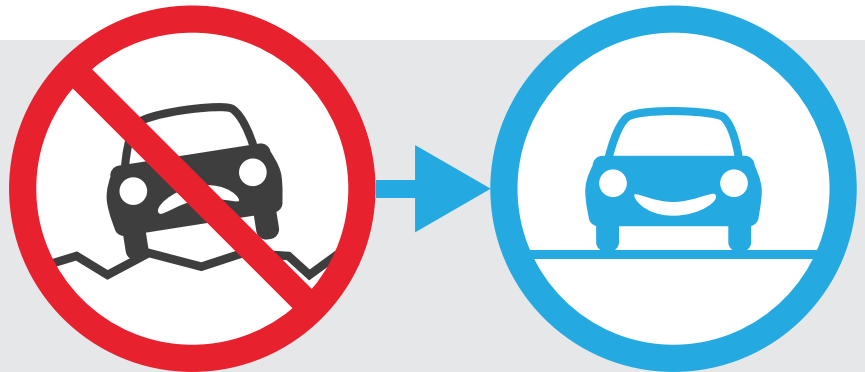

## Our roads last longer.

This saves money in the long run. By preserving our good roads, we reduce taxpayer burden by needing fewer costly road replacements.

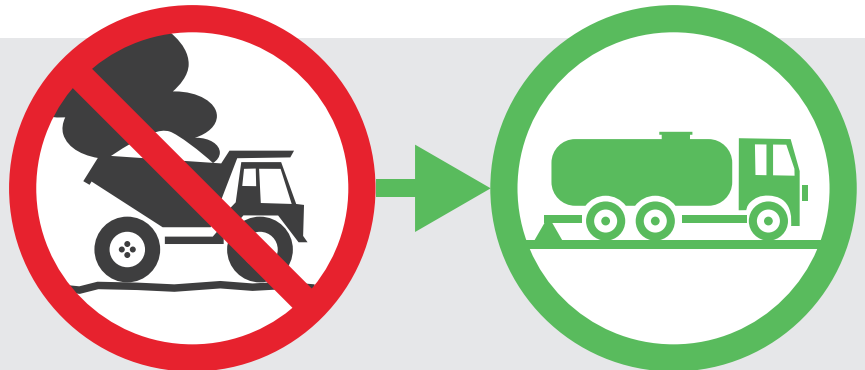

## Our roads stay in better condition.

Well-timed, cost effective treatments keep roads in good shape, which keeps drivers safe, and reduces vehicle repair costs.

## Our roads are less wasteful.

With proactive treatments, we're able to use less material and contribute to a smaller carbon footprint by avoiding wasteful trucking and hauling.
