

We are committed to making the best use of taxpayer resources for our road network.

We Recycle Our Roads.

Roads are one of our community's most valuable (and expensive) assets. When a road deteriorates, instead of removing and replacing the old material, we're re-vitalizing the pavement that's already been paid for.

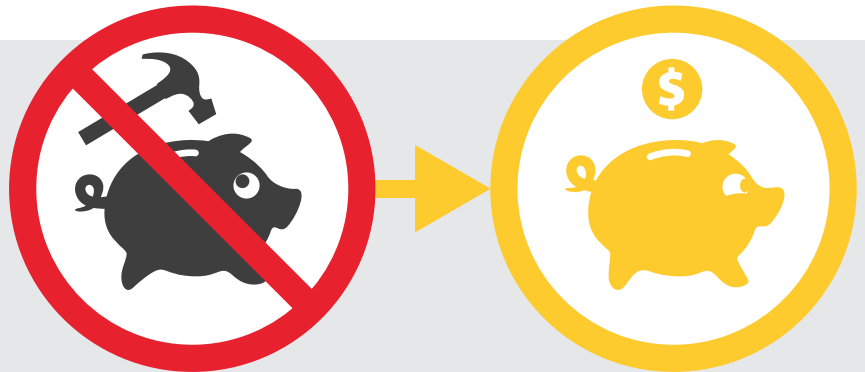

Our roads are healthier.

In-place recycling provides improved strength and condition, just like a brand new road.

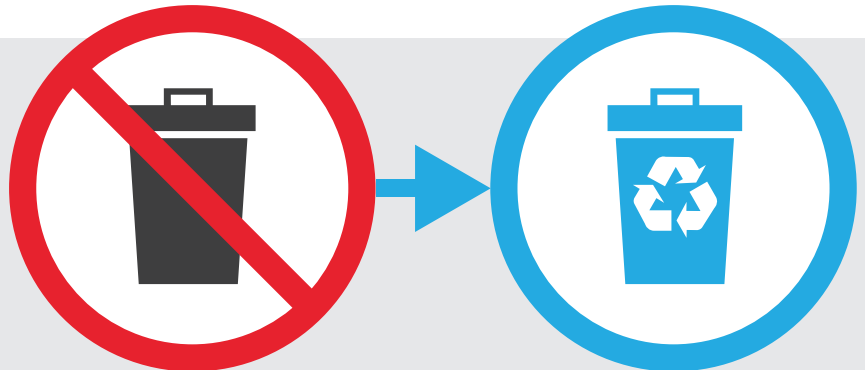

Our roads save money.

In-place recycling requires a smaller investment, making better use of taxpayer dollars.

Our roads reduce waste.

Re-using existing materials cuts down on trucking, hauling, pollution and waste.

For more information on in-place asphalt recycling, visit RoadResource.org
